

ASHOK SWAMI DevOps & Cloud Engineer

✉ ashokswami1137@gmail.com ☎ +91 9537875048 📍 Ahmedabad 🌐 ashok-swami 🔄 Ashok-Swami

PROFESSIONAL SUMMARY

DevOps & Cloud Engineer with 5+ years of experience designing, automating, and managing scalable cloud infrastructure across AWS, Azure, and GCP. Skilled in Kubernetes, Terraform, Docker, Jenkins, GitHub Actions, Linux, Python, CI/CD automation, monitoring, and Infrastructure as Code (IaC). Experienced in building secure, highly available, cloud-native platforms while improving deployment reliability, scalability, and operational efficiency.

- Reduced deployment time from 4 hours to 15 minutes through CI/CD automation - Migrated 20+ applications to cloud environments across AWS, Azure, and GCP - Maintained 99.9% uptime for production workloads - Implemented Infrastructure as Code using Terraform; built Kubernetes-based deployment platforms - Integrated DevSecOps practices and automated security scanning (Trivy, Snyk)

TECHNICAL SKILLS

Cloud Platforms

AWS, Microsoft Azure, Google Cloud Platform (GCP)

Infrastructure as Code

Terraform, Ansible

Monitoring & Logging

Prometheus, Grafana, ELK Stack

Programming & Scripting

Python, Bash, Shell Scripting

Databases

MySQL, PostgreSQL, MongoDB

Version Control

Git, GitHub, GitLab, Bitbucket

Containerization & Orchestration

Docker, Kubernetes, Helm

CI/CD

Jenkins, GitHub Actions, GitLab CI, Azure DevOps

Operating Systems

Linux (Ubuntu, CentOS, Debian, Amazon Linux)

Web Servers

Nginx, Apache

Security

DevSecOps, Trivy, Snyk, IAM

PROFESSIONAL EXPERIENCE

DevOps & Cloud Engineer, KernelEquity Technologies Pvt Ltd

01/2026 – Present | Vadodara

- Designed and managed cloud infrastructure across AWS, Azure, and GCP using Terraform
- Managed Kubernetes clusters and Docker-based containerized applications
- Built and maintained CI/CD pipelines using GitHub Actions, Jenkins, and GitLab CI
- Automated infrastructure provisioning using Infrastructure as Code (IaC)
- Implemented monitoring and observability using Prometheus, Grafana, and ELK Stack
- Managed Linux production servers, networking, SSL, and cloud security
- Supported high-availability environments and zero-downtime deployments

DevOps Engineer, Techup Software LLP

08/2023 – 12/2025 | Ahmedabad

- Designed and managed AWS cloud infrastructure using Terraform
- Built and optimized CI/CD pipelines using GitHub Actions, GitLab CI, and Jenkins
- Deployed and managed containerized applications using Docker and Kubernetes
- Integrated DevSecOps security scanning using Trivy and Snyk
- Implemented monitoring and alerting using Prometheus and Grafana
- Managed Linux production servers, cloud networking, DNS, SSL, and backups
- Delivered secure, scalable, and highly available production environments

DevOps Engineer / Backend Engineer, Learniphi Technology

12/2022 – 08/2023 | Ahmedabad

- Developed backend applications using Python, Django, Flask, and REST APIs
- Designed and maintained CI/CD pipelines using Jenkins and GitHub Actions
- Managed AWS services including EC2, S3, IAM, RDS, and CloudWatch
- Containerized applications using Docker and automated deployments

- Configured Nginx and Apache for application hosting and API routing

Software Engineer (Python/Django), Unique Mercantile India Ltd 01/2022 – 12/2022 | Ahmedabad

- Developed and maintained enterprise web applications using Python and Django
- Designed REST APIs and backend services; integrated third-party APIs and business workflows
- Optimized database performance and application reliability on Linux environments

Software Engineer (Python Developer), Logilite Technologies 06/2021 – 12/2021 | Ahmedabad

- Developed backend modules and web applications using Python
- Built REST APIs and integrated external services
- Worked with relational databases and data modeling; participated in code reviews and testing

EDUCATION

M.Tech - Cyber Security, Silver Oak University 2024 – 2026 | Ahmedabad

B.Tech - Computer Science & Engineering, Parul University 2018 – 2021 | Vadodara

Diploma - Computer Engineering, K.D. Polytechnic 2015 – 2018 | Patan

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate (In Progress)
- Introduction to Programming Using Python
- Programming with Python 3.X
- Internship in Django

KEY PROJECTS

Kubernetes Production Deployment Platform

- Deployed containerized applications using Kubernetes, Docker, Ingress, ConfigMaps, and Secrets
- Implemented monitoring with Prometheus and Grafana for scalable, highly available deployments

AWS Infrastructure Automation using Terraform

- Automated provisioning of VPC, EC2, RDS, IAM, Route53, and Security Groups using Terraform modules
- Reduced manual provisioning effort significantly through Infrastructure as Code

CI/CD Automation Platform

- Built automated pipelines using Jenkins and GitHub Actions with build, test, security scanning, and deployment stages
- Achieved faster and more reliable releases

Monitoring & Observability Platform

- Implemented Prometheus, Grafana, ELK Stack, and AlertManager with dashboards and alerts
- Improved infrastructure visibility and incident response
